Hello I am writing this letter to you, the Appanoose county board of supervisors about the condition of the gravel road located at the T intersection of 115th ave and 490th ave. Short distance north off highway 2. This intersection has been in dangerous condition all summer long. I do not wish to include my name in this but I do drive the roads quite often as I am a hired truck driver for a trucking business that gets rock from the quarry out there. The intersection is banked out so bad on the south west side it holds a lot of water and has so much bank to it that if the loaded truck took the corner in the correct side of the road it feels like it could tip. I would encourage any of you to go look at it and see. If someone was to drive the 490th road going east through the intersection if traveling the speed limit or unaware of how dangerous the dip is in the road you'd wreck for sure!! I would like this matter discussed at the next meeting you have about why it has not been addressed by the county road dept. I see absolutely no reason in contacting the county roads dept about this because they most definitely know about the conditions being I pass the drivers hauling rock quite often on the route and the grader operator does maintenance to the rest of the road but this intersection stays the same. Again it has been this way since spring I don't understand how something that could be deadly like this just gets ignored for this amount of time. Thankyou I will watch the pitch to see what is resolved hopefully.
